Call for Papers!!

AFRC 2019 Industrial Combustion Symposium
Hilton Waikoloa Village
September 9 – 11, 2019

The AFRC 2019 organizing committee cordially invites abstracts of papers for presentation at American Flame Research Committee’s 2019 Annual Industrial Combustion Symposium.

Abstracts on all topics related to combustion and flame are welcome. Presentations in our symposia cover a wide spectrum:

- From fundamental research to laboratory, pilot and full-scale testing
- From computer simulations to industrial applications
- Design, operation and troubleshooting of combustion equipment

A sampling of papers from past meetings is available on the AFRC website (www.afrc.net).

The AFRC Annual Industrial Combustion Symposia provide a unique forum for combustion professionals to network, display their work, receive direct feedback and learn from each other.
We plan to host a Focused Discussion on **Incinерators/Thermal Oxidizers** during this Symposium. If you are interested in participating as a presenter/panelist, please contact Jamal at jamal.jamaluddin@gmail.com.

**Guideline for the Abstracts**

Abstracts should be no more than one page long and should provide a brief overview of the presentation topic. These should reach Catrina Wilson (catrina.wilson@utah.edu) by the deadline of **March 15th, 2019**. Early submissions are strongly encouraged, and will receive preferential considerations by the Organizing Committee. Notification of acceptance will be communicated by **May 3rd, 2019**.

**Guideline for the Papers**

Please note that AFRC policy is “**No Paper, No Podium!”** so if you do not submit a written paper by the deadline, you will be unable to present it at the Symposium, even if your abstract had been accepted. However, AFRC is flexible regarding paper format. We are more concerned with the content and the value that it brings to the AFRC community. The full paper should reach Catrina by **July 19th, 2019**.

Please note that we intend to stick to the deadlines for receipt of abstracts and full papers, and urge you to submit your contributions early. Your cooperation and support in this regard will be highly appreciated.
